

CE-1921-11 - Dr. Durant - Quiz 6
Spring 2017, Week 6

Given the instruction `ldr r9, [sp, #0xC]` and that sp contains 0x1FF4 and memory[0x2000] contains 0xDA7ABA5E, label the single-cycle processor below taken from Figure 7.17 of your book with

9 itms

- (5 points) All control I/O values (X if don't care; for non-MUXes use meaningful name, e.g. add, eor, etc. for ALUControl) *don't forget RegSrc*
- (5 points) All relevant signal values (e.g., if ALUFlags aren't used, you can leave them unlabeled) *except PC-related values*
